Conference Venue

The venue 'Kulturhaus Schloss Grosslaupheim' in Laupheim is close-by our Ulm office and an estate with exciting historic and modern architecture.

INVITATION / CALL FOR PAPERS

International Conference on Applications for Image based Measurements

March 2nd - 3rd, 2010, Schloss Großlaupheim

Accommodation

Accommodation has been reserved for exhibitors and participants at a special discounted rate.

Please make your own reservation by using the keyword '**Dantec ICAIM**'

Hotel IBIS***

Hotel Comfor, Frauenstrasse***

Detailed information concerning the Conference, like accommodation or program will gradually be available on: www.icaim.com

Invitation

The purpose of ICAIM 2010 is to share user experience and to provide new solutions for three-dimensional, image-based measurements of deformation, displacement, vibration and NDT.

Official language of ICAIM 2010 is English.

Call for papers

The International Conference on Applications for Image based Measurements - ICAIM 2010 invites you to submit a contribution for an oral presentation of 20 minutes on the following topics.

- ESPI
- DIC
- Shearography

Deadline for submission: 29.01.2010

We are pleased to announce that Prof. Dr. Laermann from Bergische Universität Wuppertal, former Minister for Education and Science, will give a keynote lecture. 'Developments and future aspects in experimental mechanics'

Lectures

Companies and research institutes working with our systems will present their measurements and results on interesting applications.

Practical Session

During the practical sessions we provide the opportunity to learn more about our systems. You will also have the opportunity to exchange experiences about our products and their applications with other users.

Exhibition

In parallel to the scientific sessions, companies are invited to present products and processes in the field of measurement technologies, lasers and cameras.

Partners from last conference:

- Coherent
- GESA 'Gemeinschaft Experimentelle Strukturanalyse'
- Innolas 'Innovative Lasertechnologie'
- KUKA
- Vishay Measurement GmbH
- Zwick GmbH
