Project description Thermal analysis

Company, Institute:

Contact perseon:

Phone:

Email:

Application(s):

Method: DIL or TM:

Material:

Sample type (solid / powdery / liquid / semi-solid / amorphous / crystalline):

Sample amount, volume or dimension min. - max. [mg / ml / mm]:

Crubile material, chemical compatibility:

Temperature range [-180 C° … +2800°C]:

Max. heating rate [K/min]:

Atmosphere(s), gases, humidity:

Accuracy requirement / resolution:

Force range [N]:

Data to be collected:
Temperature [°C]:
Expansion [nm / µm]:
Aim(s) of analysis / standards:
Raw data:
Data import and export (ASCII):
Software features:
AutoEvaluation (automatic evaluation for TMA):
Identify (database comparison for DIL & TMA):
c-DTA® (additional DTA-Signal for DIL & TMA):
SUPER-RES (rate-controlled temperature management DIL & TMA):
Temperature Modulation (for DIL & TMA):
Density determination (for DIL & TMA):
Peak Seperation (for DIL)
Kinetics Neo (kinetic analysis):
